🌐 portfolio-suman-44.vercel.app 📍 Jamshedpur, Jharkhand, India

SKILLS

Programming Languages: C, Java, JavaScript, TypeScript, Golang, HTML5, CSS3

Libraries & Frameworks: Spring Boot, NodeJs, ExpressJs, React, React Native, Tailwind CSS

Developer Tools: Linux, Git, Docker, RabbitMQ, Apache Kafka, AWS S3, AWS EC2, AWS RDS

Databases: MongoDB, PostgreSQL, Redis

Others: Data Structures and Algorithms, Full Stack Development, Android app development

EXPERIENCE

Full Stack Developer Intern

July 2026 – Present

Mentorque (Remote)

- Resolved multiple production issues across frontend and backend services, including the Mentorque Chrome extension, improving platform stability and user experience.
- Implemented a client-side PDF parser, reducing document processing time from **6–7 seconds** to **~0.5 seconds**.
- Integrated OmniScout's asynchronous automated job aggregation system into the Mentorque platform and developed three dedicated dashboards for monitoring and managing the feature.

PROJECTS

Codify – Competitive Programming Platform 🚀 | *Java, Spring Boot, React, PostgreSQL, Docker, Kafka, Redis*

- Built an online judge platform **inspired by LeetCode** using Spring Boot and React, executing user-submitted code in **isolated Docker sandboxes**; supports **multiple languages** with consistent **sub-3s execution** turnaround during testing.
- Architected an **asynchronous** submission pipeline with Apache Kafka, Executed code submissions of **1000+ virtual users** with **100%** success rate during load testing.
- Implemented AI-driven time and space complexity analysis alongside interactive user statistics including **daily submission heatmaps**, increasing average session engagement.
- Added JWT/OAuth2 authentication and a Role-Based Admin Dashboard to manage users, curate problems, and monitor system-wide health metrics across multiple registered test accounts.

OmniScout – Automated Job Aggregation Platform 🚀 | *React, Node.js, PostgreSQL, BullMQ, Redis, Playwright*

- Architected a scalable, **asynchronous web scraping engine** using Playwright, BullMQ, and Redis to ingest job listings from 7+ major portals (LinkedIn, Indeed, Workday) while successfully **bypassing bot detection**.
- Integrated Groq AI API(LLM) to parse unstructured resume data and extract actionable candidate profiles (skills, past titles, seniority), utilizing this data to dynamically generate targeted search queries.
- Ensured high reliability of the automated scraping engine by implementing **Node-cron jobs** for daily, **zero-touch data ingestion**, alongside an automated Cloudinary integration that captures and streams Playwright error screenshots for rapid debugging.

ByteFeed – Social Media 🚀 | *Golang, React Native, NativeWind, PostgreSQL, Cloudinary, Livekit*

- Launched a modern mobile community platform with personalized feeds, real-time voice channels, and DM calls; achieved **<200 ms** average message delivery latency with multiple **concurrent users** in load tests.
- Built a secure REST API with Gorilla Mux and PostgreSQL, supporting complex user-relationship graphs.
- Integrated **LiveKit (WebRTC)** for **low-latency** voice/video calls and **Gorilla WebSockets** for real-time text messaging; maintained stable connections across multiple simultaneous channel sessions in testing.

ACHIEVEMENTS

- Achieved **Top 0.02%** global ranking on LeetCode by solving **800+ problems** across data structures and algorithms.
- Won TechSprint Hackathon** organised by Google Developer Groups at AJU.

EDUCATION

Arka Jain University

Bachelor of Computer Application

2025 – 2028

CGPA – 9.1 / 10
